PROFESSIONAL SUMMARY

Results-driven **Flutter Developer with 2+ years of experience** building high-performance, cross-platform mobile applications for Android and iOS. Proven ability to architect scalable solutions using Flutter, Dart, and modern state management (GetX, Riverpod, Provider), with a strong focus on pixel-perfect UI/UX, clean architecture, and production-ready delivery. Experienced collaborating with design, backend, and QA teams in fast-paced, Agile environments. Rapidly promoted from Intern to Associate Software Engineer within one year at Softude, consistently delivering complex features on schedule.

CORE SKILLS

- **Mobile Development:** Flutter, Dart, Android, iOS, Platform Channels
- **Architecture:** Clean Architecture, MVVM, MVC, Modular Codebase
- **State Management:** BLoC, Riverpod, GetX, Provider
- **Backend & APIs:** RESTful APIs, Firebase (Auth, Cloud, FCM, Crashlytics), Third-party API, Dio
- **UI/UX:** Material Design, Responsive & Adaptive Layouts, Custom Widgets
- **Tools & DevOps:** Git, GitHub, Android Studio, Postman, CI/CD, Google Maps, WebSocket
- **Deployment:** Google Play Store, Apple App Store

WORK EXPERIENCE

Freelance Flutter Developer

Self-employed (Fiverr / Upwork)

Apr 2026 – Present

Remote

- Building and delivering cross-platform Flutter applications for clients across Android, iOS, and Web using Clean Architecture, GetX, Riverpod, Firebase, and REST APIs.
- Managing end-to-end project delivery independently — from requirements and UI/UX implementation to testing, Play Store deployment, and post-launch support.

Associate Software Engineer

Softude

May 2025 – March 2026

Indore, India

- Promoted from Intern → Graduate Engineer Trainee → Associate Software Engineer in under 12 months, outpacing the standard 18-month progression track.
- Collaborated daily with UI/UX designers, backend engineers, and QA teams to translate designs into pixel-perfect, responsive Flutter UIs across phone and tablet form factors.
- Delivered end-to-end sprint features in Agile/Scrum cycles, consistently meeting sprint deadlines across 3 concurrent enterprise mobile projects.
- Mentored 2 junior Flutter developers through code reviews and pair-programming sessions, accelerating team output and ensuring on-schedule delivery of production features.

Graduate Engineer Trainee

Softude

Nov 2024 – Apr 2025

Indore, India

- Engineered a reusable Flutter component library (30+ custom widgets) aligned with modern UI/UX practices, reducing new-feature development time and enforcing design consistency.
- Integrated 15+ REST API endpoints with error-handling, loading states, and retry logic using Dio; implemented reactive state management with GetX and Provider for real-time, responsive UIs.
- Profiled production builds with Flutter DevTools, improving average frame rate consistency across core application modules.

Software Engineer Intern

Softude

Sep 2024 – Oct 2024

Indore, India

- Designed and deployed RESTful backend services using Node.js and MongoDB, establishing CRUD endpoints consumed by the Flutter frontend team.
- Enforced Git branching strategy (feature/release) and pull-request review workflows, improving team-wide code quality.
- Debugged and resolved 10+ critical issues within the first four weeks, directly enabling a stable MVP release.

Trainee Software Developer

InfoBeans Foundation

May 2023 – Jul 2024

Indore, India

- Completed a 14-month program covering Java, JavaScript, and the full MERN stack (MongoDB, Express.js, React.js, Node.js) with project-based assessments and mentored code reviews.

- Built and shipped 3 full-stack applications including an e-commerce platform and SPA, handling REST API design through to responsive frontend implementation.
- Applied Microservice and MVC architecture patterns, improving codebase modularity and reducing feature delivery time across collaborative team projects.

Android & Flutter Developer Intern

Jan 2023 – Jun 2023

mBrainApps

Indore, India

- Developed native Android and Flutter applications with responsive UI, state management, and REST API integration for scalable cross-platform mobile solutions.
- Integrated device-native features including camera, GPS/location services, local storage, push notifications, file handling, and runtime permissions using Android SDK and Flutter plugins.
- Collaborated with developers in debugging, testing, and deploying mobile applications while following MVC architecture, clean coding standards, and Git-based version control workflows.

PROJECTS

Eicher SiteOne – Enterprise Cross-Platform Mobile & Web App

Flutter · Node.js · PostgreSQL · SAP

- Architected and delivered a cross-platform (Android, iOS, Web, Tablet) vehicle service management app for the construction and mining sectors; implemented a 7-stage job card lifecycle (T0–T6) with real-time customer approvals, cost summaries, and automated invoice generation.
- Designed highly responsive, adaptive Flutter UIs following Material Design guidelines, ensuring consistent UX across mobile and tablet form factors used by 500+ field technicians.
- Integrated SAP (DBM), Telematics, and Predictive Diagnostics for auto job card generation; secured the platform with role-based access control via Active Directory and SAP NetWeaver Gateway.
- **Live (mobile):** play.google.com/store/apps/details?id=com.eicher.siteone
- **Live (web):** dev-vecvsitesupport.siplsolutions.com

Voice Buddy – Real-Time Voice Calling App

Flutter · Firebase · Agora RTC · REST APIs

- Built a production-grade, cross-platform voice calling app featuring topic-based matchmaking; integrated Agora RTC Engine for sub-200ms, high-fidelity calls with mute and speaker controls on both Android and iOS.
- Implemented multi-layer authentication (Google Sign-In, Firebase Auth, JWT) with AES-encrypted local storage; architected reactive state with GetX MVC and Dio for all API interactions.
- Shipped bilingual (English/Hindi) localization, fully responsive dark UI via `flutter_screenutil`, and a 4-step onboarding flow ensuring seamless UX across 5+ device sizes.

FileSecure – Document Scanner & Secure Vault (Android)

Flutter · Android · AES-256 · Biometric Auth

- Built an all-in-one document scanner and encrypted vault app with AES-256 encryption and stealth mode; implemented biometric (fingerprint & face recognition) and PIN-based authentication for secure access.
- Developed PDF scanning with multi-page capture, HD quality, auto-cropping, and image filters; designed smart file management with folder organization, grid/list views, full-text search, and one-tap import/export.
- **Live:** play.google.com/store/apps/details?id=com.photoandvideoapps.fileSecurevault

EDUCATION

Master of Computer Applications (MCA)

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV)

2024 – Present

Bhopal, India

Bachelor of Computer Applications (BCA)

Devi Ahilya Vishwavidyalaya (DAVV)

2021 – 2024

Indore, India

- CGPA: 8.20 / 10
