PROFESSIONAL SUMMARY

Results-driven **Flutter Developer with 3+ years of experience** building high-performance, cross-platform applications for Android, iOS, and Web. Proven ability to architect scalable solutions with Flutter, Dart, and modern state management (Riverpod, GetX, Provider), including enterprise SAP integrations and Play Store-published apps. Strong focus on pixel-perfect UI/UX, clean architecture, and production-ready delivery in fast-paced Agile/Scrum environments. Rapidly promoted from Intern to Associate Software Engineer in 12 months at Softude while leading features across concurrent enterprise mobile projects.

CORE SKILLS

- **Mobile Development:** Flutter (Android, iOS, Web), Dart, Platform Channels, Google Maps
- **Architecture:** Clean Architecture, MVVM, MVC, Repository Pattern, Modular Codebase
- **State Management:** Riverpod, GetX, Provider, Bloc
- **Backend & APIs:** RESTful APIs, Firebase (Auth, Firestore, FCM, Crashlytics), Third-party APIs, WebSocket
- **Testing & Quality:** Unit Testing, Widget Testing, Integration Testing, Flutter DevTools
- **UI/UX:** Material Design, Responsive & Adaptive Layouts, Custom Widgets
- **Tools & DevOps:** Git, GitHub, GitHub Actions, Android Studio, Xcode, Postman, CI/CD
- **Deployment:** Build Flavors, Code Signing, Google Play Store, Apple App Store

WORK EXPERIENCE

Freelance Flutter Developer

Self-employed (Fiverr / Upwork)

Apr 2026 – Present

Remote

- Delivering cross-platform Flutter apps for international clients across Android, iOS, and Web using Clean Architecture, Riverpod, GetX, Firebase, and REST APIs.
- Managing end-to-end delivery independently—requirements gathering, UI/UX implementation, widget/integration testing, Play Store deployment, and post-launch support.

Associate Software Engineer (Intern to Associate)

Softude

Sep 2024 – Mar 2026

Indore, India

- Promoted from Intern to Graduate Engineer Trainee to Associate Software Engineer in 12 months, outpacing the standard 18-month progression track.
- Led Flutter feature delivery on Eicher SiteOne (500+ field technicians), building tablet-adaptive job card workflows and enterprise UIs across Android, iOS, and Web.
- Engineered a reusable Flutter component library (30+ custom widgets) and integrated 15+ REST API endpoints with Dio, error handling, and retry logic using GetX and Provider.
- Delivered end-to-end sprint features across 3 concurrent enterprise mobile projects; mentored 2 junior Flutter developers via code reviews and pair programming.
- Managed Play Store releases with build flavors (dev/staging/prod), code signing, and Crashlytics triage; added widget tests for critical flows to reduce sprint regressions.
- Deployed Node.js/MongoDB REST services for the Flutter team; resolved 10+ critical issues in the first four weeks, enabling a stable MVP release.

Android & Flutter Developer Intern

mBrainApps

Jan 2023 – Jun 2023

Indore, India

- Developed native Android and Flutter applications with responsive UI, state management, and REST API integration for scalable cross-platform mobile solutions.
- Integrated device-native features including camera, GPS/location services, local storage, push notifications, and runtime permissions using Android SDK and Flutter plugins.

PROJECTS

Eicher SiteOne – Enterprise Cross-Platform Mobile & Web App

Flutter · Node.js · PostgreSQL · SAP

- Architected a cross-platform (Android, iOS, Web, Tablet) vehicle service management app for construction and mining; implemented a 7-stage job card lifecycle (T0–T6) with real-time approvals, cost summaries, and automated invoicing.
- Integrated SAP (DBM), Telematics, and Predictive Diagnostics via Platform Channels; secured the platform with RBAC via Active Directory and SAP NetWeaver Gateway for 500+ field technicians.
- **Live (mobile):** play.google.com/store/apps/details?id=com.eicher.siteone

- **Live (web staging):** dev-vecvsitesupport.siplsolutions.com

FileSecure – Document Scanner & Secure Vault

Flutter · AES-256 · Biometric Auth

- Built an all-in-one document scanner and encrypted vault with AES-256 encryption, stealth mode, and biometric/PIN authentication; **10,000+ Play Store downloads**.
- Developed multi-page PDF capture with HD quality, auto-cropping, image filters, folder organization, full-text search, and one-tap import/export.
- **Live:** play.google.com/store/apps/details?id=com.photoandvideoapps.fileSecurevault

WorkSync – Geofence Attendance Tracker

Flutter · Riverpod · Firebase · Google Maps · GoRouter

- Built geofence-based punch in/out with employee history and admin office CRUD via map picker; implemented feature-first architecture with GoRouter guards and Firestore security rules.
- **GitHub:** github.com/satishvishwakarma24/attendance_tracker

SARTHAK – Community Events Platform

Flutter · Firebase · Real-time Location

- Shipped a community social platform with groups, events, and live location sharing; implemented encrypted transit and deletion-on-request compliance.
- **Live:** play.google.com/store/apps/details?id=com.automated.eventapp

Voice Buddy – Real-Time Voice Calling App

Flutter · Firebase · Agora RTC · REST APIs

- Built a cross-platform voice calling app with topic-based matchmaking; integrated Agora RTC Engine for sub-200ms calls with mute and speaker controls on Android and iOS.
- Implemented multi-layer auth (Google Sign-In, Firebase Auth, JWT) with AES-encrypted local storage; shipped bilingual (EN/HI) localization and responsive dark UI.

Age Calculator – Utility App with Localization

Flutter · Provider · Freezed · Google Mobile Ads

- Built a cosmic-themed age utility with planetary age view, members CRUD, birthday countdown, multi-language support (110n), and a custom design system.
- **GitHub:** github.com/satishvishwakarma24/age_calculator

EDUCATION

Master of Computer Applications (MCA)

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)

2024 – Present

Bhopal, India

Bachelor of Computer Applications (BCA)

Devi Ahilya Vishwavidyalaya (DAVV)

2021 – 2024

Indore, India

- CGPA: 8.20 / 10

Professional Training – MERN Stack & Full-Stack Development

InfoBeans Foundation

May 2023 – Jul 2024

Indore, India

- Completed a 14-month program covering Java, JavaScript, and MERN stack (MongoDB, Express.js, React.js, Node.js) with project-based assessments and mentored code reviews.
- Built and shipped 3 full-stack applications including an e-commerce platform and SPA with REST API design and responsive frontend implementation.
